Jan Kroman - Director
AAA, MRAIC, MArch, BSc

Jan joined the board in the fall of 2024.

He is a Registered Architect with both international and local experience — having worked for acclaimed design firms in Holland, Japan, Toronto, and Calgary. His focus of practice centers on projects that are socially motivated, providing benefit for the communities in which they're sited. This has led Jan to explore design in the fields of healthcare, housing and civic buildings.

Due to his varied background holding both a Bachelor of Engineering Degree from the University of Calgary and a Masters of Architecture degree from the University of Toronto, Jan takes pride in weaving the technical and the emotional aspects of architecture together, aiming to create cohesive soulful spaces.

Interested in the intersection of art, urbanity, and architecture, Jan has previously taught at the Faculty of Environmental Design at the University of Calgary; volunteered with Calgary Arts Development and D.Talks (Design Talks Institute); and collaborated on the Tower Renewal Guidelines publication. Additionally, Jan has sat as a board member on the Calgary Public Art Board, and as the Intern Representative on the Alberta Association of Architects Council. He was also named as one of Edify's Top 40 under 40 in 2020.
